09 Creating Accounts

10 Email Settings

11 Composing Emails

12 Attachments

13 Managing Spam

14 Email Organization

15 Internet Safety

16 Cloud Storage

▲ TODAY

Recap: Chapter 8

1

Email Travels in Steps

Compose → SMTP → DNS lookup → delivered.

2

Providers Differ by Storage & Purpose

Gmail, Outlook, Yahoo, and ProtonMail each have a niche.

3

Every Address Has 3 Parts

Local part, @ symbol, and domain.

4

One @ Symbol, No Spaces

The basic rule behind every valid email address.

Quick check: which part of an email address comes after the @ symbol?

Today's Objectives

1

Create a Gmail Account

Walk through all 10 steps, from name to accepting terms.

2

Set Up Other Providers & 2FA

Try Outlook or ProtonMail, and enable Two-Factor Authentication.

3

Separate Personal & Professional Email

Know when to use which, and why it matters.

4

Log In and Out Securely

Handle forgotten passwords and always sign out safely.

We'll close with a 4-question recap — keep these four goals in mind.

CHAPTER 09

Creating Email Accounts

Step-by-step guide to creating and managing email accounts

Creating a Gmail Account

1

Go to gmail.com

Or accounts.google.com/signup

2

Click 'Create Account'

Select 'For my personal use'

3

Enter Your Name

First name and last name

4

Choose Username

Create your Gmail address

5

Create Password

8+ chars, mixed case, numbers

6

Add Phone Number

For security & account recovery

7

Verify with Code

Code sent via SMS to your phone

8

Add Recovery Email

Optional but strongly recommended

9

Enter Birthday & Gender

Required by Google

10

Agree to Terms

Review and accept Google's Terms

Account created! You can now send & receive emails and access all Google services

Other Accounts & Two-Factor Authentication

Outlook (outlook.com)

- Go to outlook.com
- Click 'Create free account'
- Choose @outlook.com address
- Create a password
- Enter personal information
- Verify phone or email

ProtonMail (protonmail.com)

- Go to protonmail.com
- Click 'Create a free account'
- Choose plan (Free tier)
- Create username & password
- Add recovery email (optional)
- Verify humanity (CAPTCHA)

Two-Factor Auth (2FA)

What it is:

Password + a second verification step (SMS code, authenticator app, or security key)

Setup in Gmail:

Settings → Security → 2-Step Verification → Get started

Personal vs. Professional Email

Personal: john.doe@gmail.com • johndoe2024@outlook.com • Use for personal, social, shopping

Professional: john.doe@company.com • info@business.pk • Use for work, job applications, clients

 *Best practice: Keep personal and professional emails completely separate*

Logging In & Out Securely

Logging In

1

Navigate to Login Page

Go to gmail.com or outlook.com

2

Enter Email Address

Type your full email address

3

Enter Password

Password is hidden as you type

4

Click Sign In

Access your inbox

Forgot Password?

Click 'Forgot password?' → Enter email → Follow verification → Create new password

Logging Out

How:

- Click profile picture/initial (top right)
- Select 'Sign out' or 'Log out'
- Or close browser (if not using Remember me)

Always log out when:

- ⚠ Using a public or shared computer
- ⚠ Leaving your computer unattended
- ⚠ Finished using email for the day

Security tip:

Always check for HTTPS · Don't use Remember me on shared devices · Clear cache when done

Practice Exercise

1

Walk the Signup Steps

Go through the 10 Gmail signup steps together, on-screen or on paper.

2

Turn On 2FA

If you have an account, enable 2-Step Verification in Settings → Security.

3

Sort Your Emails

List which of your own emails are personal vs. professional.

4

Practice Logging Out

Click your profile icon and sign out properly.

Take 10 minutes — pair up if you'd like, then we'll review together.

Key Takeaways

1

Signup Takes About 10 Steps

Name, username, password, phone, and recovery info.

2

2FA Adds a Second Lock

SMS code, authenticator app, or security key.

3

Keep Personal & Professional Separate

One for work, one for everything else.

4

Always Log Out on Shared Devices

Public computers, unattended machines, end of day.
