[Recap](#) · [Chapter 14](#)

Recap: Chapter 14

1

F7 Checks the Whole Document

One shortcut catches most spelling and grammar issues.

2

Red Means Spelling, Blue Means Grammar

The underline color tells you what kind of issue it is.

3

The Editor Pane Sees the Bigger Picture

It scores your whole document, not just one error at a time.

4

Proofing Tools Help, But Don't Replace You

Always give your document one final read yourself.

Preview

Today's Objectives

1

Turn On Track Changes

Record every edit automatically as you make it.

2

Read Tracked Changes

Understand what underlines and strikethrough marks mean.

3

Accept & Reject Changes

Settle each tracked edit, one at a time or all at once.

4

Add Comments

Leave a note on the text without changing the words themselves.

Turning On Track Changes

1

Review Tab → Track Changes

Click Track Changes, or press Ctrl+Shift+E, to start recording every edit.

2

What Gets Recorded

Every insertion, deletion, and formatting change is marked automatically.

3

Turning It Off

Click Track Changes again to stop recording new edits.

4

Who Made the Change

Word labels each edit with the name of the person who made it.

Reading Tracked Changes

1

Underlined Text

Underlined text in a new color shows something that was inserted.

2

Strikethrough Text

Text with a line through it shows something that was deleted, but not removed yet.

3

The Markup Bar

A vertical line in the left margin marks every line that has a change.

4

Simple vs. All Markup

Review tab → Display for Review switches between a clean preview and full markup.

[Theory](#) · [Accepting & Rejecting](#)

Accepting & Rejecting Changes

1

Accept a Change

Review tab → Accept. This keeps the edit and removes the markup.

2

Reject a Change

Review tab → Reject. This undoes the edit and restores the original text.

3

Accept or Reject All

Accept All or Reject All applies the same decision to every change at once.

4

Review One at a Time

Next and Previous buttons step through changes so nothing gets missed.

[Theory](#) · [Adding Comments](#)

Adding Comments

1

Insert Tab → Comment

Select text, then Insert tab → Comment, to leave a note without editing the text.

2

Replying to a Comment

Click Reply inside a comment to respond without starting a new one.

3

Resolving a Comment

Mark a comment Resolved once it has been addressed. It fades but stays visible.

4

Deleting a Comment

Right-click a comment and choose Delete Comment to remove it completely.

PRACTICE

Track Your Edits

1

Turn On Track Changes

Review tab → Track Changes, or press Ctrl+Shift+E.

2

Type a Sentence

Type: “This report was reviewed on time.”

3

Make an Edit

Delete the word “reviewed” and type “completed” in its place.

4

Check the Markup

Confirm your edit shows as tracked, with the old word struck through.

PRACTICE

Resolve the Changes

1

Open the Review Tab

Click into your tracked sentence from the last slide.

2

Accept the Edit

Review tab → Accept. Confirm the markup disappears.

3

Make Another Edit

Type one more sentence with Track Changes still on.

4

Reject It This Time

Review tab → Reject. Confirm the sentence returns to how it was.

Wrap-Up

Key Takeaways

1

Track Changes Records Every Edit

Insertions, deletions, and formatting changes all get marked.

2

Underline Means Added, Strikethrough Means Removed

The two markup styles tell different stories.

3

Accept or Reject Settles Each Change

One decision at a time, or all at once.

4

Comments Discuss Without Editing

Leave a note on the text without changing the words themselves.

Next up — Chapter 17: Mail Merge Basics
