Recap: Chapter 18

1

Headings Build the TOC

Heading styles are what the Table of Contents reads.

2

TOC Needs Manual Updates

Right-click → Update Field after any change.

3

Footnotes Renumber Automatically

Add or delete one, and the rest adjust themselves.

4

The Navigation Pane Is Your Map

See and jump between every heading at a glance.

Preview

Today's Objectives

1

Export to PDF

Turn a document into a PDF that looks the same everywhere.

2

Print a Document

Preview and print with confidence, without wasting paper on mistakes.

3

Share Files with OneDrive

Send a link instead of an email attachment.

4

Protect a Document

Lock a file with a password, or restrict editing.

Theory · [Exporting to PDF](#)

Exporting to PDF

1

File → Export → Create PDF

This is the most reliable way to save a document as a PDF.

2

Save As → PDF

Save As also lets you pick PDF as the file type directly.

3

Why Export to PDF

A PDF looks the same on every device, and can't be accidentally edited.

4

Check Before Sharing

Open the PDF once to confirm formatting, fonts, and images all look correct.

[Theory](#) · [Printing a Document](#)

Printing a Document

1

File → Print (Ctrl+P)

This opens the print settings and a preview of exactly what will print.

2

Choosing a Printer

Pick the correct printer from the dropdown before printing.

3

Print Range & Copies

Print all pages, a specific range, or several copies at once.

4

Print Preview Catches Mistakes

Always check the preview. It is faster than reprinting a mistake.

Sharing & OneDrive

1

Save to OneDrive

Saving to OneDrive instead of your computer makes a file easy to share.

2

The Share Button

The top-right Share button sends a link instead of an email attachment.

3

View vs. Edit Permissions

Choose whether people you share with can only view, or also edit.

4

Working Without Internet

Without OneDrive, sharing means attaching the file directly to an email.

[Theory](#) · [Protecting a Document](#)

Protecting a Document

1

Password to Open

File → Info → Protect Document → Encrypt with Password locks the file completely.

2

Restrict Editing

Protect Document → Restrict Editing allows reading but blocks changes.

3

Mark as Final

A gentle warning that discourages further edits, without a password.

4

Remember Your Password

Word cannot recover a lost password. Write it down somewhere safe.

PRACTICE

Export Your Document

1

Type a Short Notice

Type: "Certificate distribution will be held on Friday."

2

Open Export

File tab → Export → Create PDF/XPS Document.

3

Save the PDF

Name it YourName_Notice.pdf. Save it in your practice folder.

4

Open and Check It

Open the PDF file. Confirm the text looks correct.

PRACTICE

Preview Before You Print

1

Open Print Settings

Press Ctrl+P to open the print screen.

2

Check the Preview

Look at the preview pane on the right before printing anything.

3

Set Copies to 2

Change the number of copies to 2, without actually printing.

4

Cancel Safely

Press Esc, or click Back, to leave without printing.

Wrap-Up

Key Takeaways

1

PDF Keeps Formatting Safe

A PDF looks the same everywhere and resists accidental edits.

2

Ctrl+P Shows You Before You Commit

Always preview before sending a job to the printer.

3

OneDrive Makes Sharing Simple

A link replaces the need for email attachments.

4

Passwords Lock Documents Completely

But a lost password can never be recovered.
