[Recap](#) · [Chapter 8](#)

Recap: Chapter 8

1

Headers & Footers Repeat Automatically

Set them once and every page updates.

2

Page Numbers Update Themselves

Add or remove pages and the count stays accurate.

3

Cover Pages Are the Exception

Different First Page keeps a title page clean.

4

Double-Click to Edit

The fastest way into a header or footer is double-clicking it directly.

Preview

Today's Objectives

1

Insert Tables

Add a table with an exact number of rows and columns.

2

Add & Remove Rows and Columns

Adjust a table's structure as data changes.

3

Format a Table's Look

Apply a consistent style with one click from the Table Styles gallery.

4

Merge, Split & Sort Table Data

Combine or divide cells, and put rows in the right order automatically.

[Theory](#) · [Inserting a Table](#)

Inserting a Table

1

Insert Tab → Table

Insert tab → Table — drag across the grid to pick how many rows and columns you need.

2

Insert Table Dialog

Insert Table... lets you type an exact number of rows and columns instead of dragging.

3

Moving Between Cells

Press Tab to move to the next cell, or Shift+Tab to move back.

4

Adding a Row at the End

Press Tab in the very last cell to automatically add a new row.

[Theory](#) · [Rows & Columns](#)

Adding & Removing Rows and Columns

1

The Layout Tab (Table Tools)

Click inside a table to reveal Table Tools → Layout, where row/column tools live.

2

Insert Above/Below/Left/Right

The Layout tab has four buttons to insert a row or column exactly where you click.

3

Delete Rows, Columns, or the Table

Layout tab → Delete — choose exactly what to remove, cell contents included.

4

The Quick Insert Icon

Hover just outside a table's edge for a small + icon — click it to insert instantly.

[Theory](#) · [Formatting a Table](#)

Formatting a Table

1

Table Styles Gallery

Table Tools → Design tab — one click applies a complete color and border scheme.

2

Header Row Option

Design tab → check Header Row to make the first row bold and visually distinct.

3

Banded Rows

Banded Rows alternates row shading, making wide tables easier to read across.

4

Custom Borders & Shading

Design tab → Borders / Shading for manual control beyond the built-in styles.

Theory · Merge, Split & Sort

Merging, Splitting & Sorting

1

Merge Cells

Select two or more cells, right-click, and choose Merge Cells to combine them into one.

2

Split Cells

Right-click a cell → Split Cells to divide it into more rows or columns.

3

Sort a Table

Layout tab → Sort — arrange rows alphabetically or numerically by any column.

4

Convert Text to Table

Insert tab → Table → Convert Text to Table. This turns tab- or comma-separated text into a real table.

PRACTICE

Build a Class Schedule

1

Insert the Table

Insert tab → Table → drag to create a table with 3 columns and 4 rows.

2

Type the Header Row

Type these three headers, one per cell: “Day,” “Time,” “Subject.”

3

Fill in One Row

Type this row: “Monday,” “10:00 AM,” “MS Word.”

4

Add the Next Row

Press Tab in the last cell of that row and type: “Tuesday,” “11:00 AM,” “MS Excel.”

PRACTICE

Edit the Schedule

1

Insert a Row Below

Click in the “Tuesday” row, then Layout tab → Insert Below.

2

Fill the New Row

Type: “Wednesday,” “12:00 PM,” “MS PowerPoint.”

3

Insert a Column

Click in the “Time” column, then Layout tab → Insert Right, and type the header “Room.”

4

Delete a Row

Click in any row you don’t need, then Layout tab → Delete → Delete Rows.

Wrap-Up

Key Takeaways

1

Tab Moves You Forward

Tab jumps to the next cell. From the last cell, it creates a new row.

2

Layout Tab Controls Structure

Insert and delete rows/columns from Table Tools → Layout.

3

Design Tab Controls Looks

One click from the Table Styles gallery gives a complete, consistent look.

4

Merge and Sort Add Polish

Merge cells for headers that span columns. Sort your data to organize it instantly.
